Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Pietryk et al. (4,679,983).

Pietryk discloses a bidirectional hydraulic pump (Figs. 1, 2) that comprises a hydraulic body 3 comprising an inlet port receiving a water flow, a first outlet port 5 and a second outlet port 6; an impeller 9 housed in the hydraulic body which causes the water flow to move in one direction or the other; a valve body 8 that surrounds the impeller, the valve body comprising at least one orifice 14 and said valve body being slidable on the internal surface of the hydraulic body in either one direction or the other, due to action of the water flow, between a first position wherein the orifice is aligned with the first outlet port and a second position wherein the orifice is aligned with the second outlet port; and

wherein the hydraulic body 3 has a substantially cylindrical inner surface, the inlet port being coaxial with the turning axis of the impeller (Fig. 1), and the first and the second outlet ports being placed on the lateral peripheral surface of the hydraulic body (Fig. 2), the valve body being a hollow cylindrical body that is coaxial with the turning axis of the impeller, and the orifice 14 being placed on the lateral peripheral surface of the valve body (Fig. 2).

Allowable Subject Matter

3. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Prior Art

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 2 patents.

Novitsky (3,147,909) and Ishii (4,728,260) are cited to show different reversible pumps.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Ninh Nguyen whose telephone number is (703) 305-0061 or (571) 272-4823 after November 18, 2004. The examiner can be normally reached on Monday-Friday from 7:30 A.M. to 5:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Look, can be reached at (703) 308-1044 or (571) 272-4820 after November 18, 2004. The fax number for this group is 703-872-9306.
